

## d-Nav<sup>®</sup> Fact Sheet

**Categories:** Diabetes Management, Digital Therapeutics, Specialty Provider

### Headquarters

Hygieia  
28803 Eight Mile Road, Suite #101  
Livonia, MI 48152

### Clinic Location

d-Nav Care Center  
28803 Eight Mile Road, Suite #103  
Livonia, MI 48152

**Founded** 2008 in Ann Arbor, Michigan

### Executive Leadership

**CEO and Chairman:** Eran Bashan, Ph.D.

**Medical Director:** Israel Hodish, M.D., Ph.D.

**Chief Commercial Officer:** Mary Ann Tournoux

**Chief Technology Officer:** Mark Willis

### d-Nav Insulin Management Program

Effective and safe insulin management requires at least weekly dose adjustments. But most patients are only able to see their physician a few times per year. d-Nav helps people with type 2 diabetes use insulin in a more safe and effective way to control their blood sugar levels. d-Nav Technology leverages current and historic glucose readings to make autonomous insulin dose recommendations, using a proprietary algorithm. Patient progress is monitored by a trained team of clinicians. Studies show that 90% of people using d-Nav achieve lower HbA1c levels within three months.

- Makes insulin management safer and more effective
- Simplifies use
- Evidence-based care model
- Tested, peer-reviewed, published and patented internationally
- d-Nav Technology is FDA cleared
- About 3,000 patient years of data and about 3.5 million dose recommendations
- Aids time-strapped physicians in maximizing complex patient care

### Diabetes in Michigan

- Over 1 million residents have diabetes, 95% of whom have type 2
- More than 50,000 new diagnoses are made annually
- Medical expenses are 2.3 times higher for individuals with diabetes than those without
